

ARGOS LINKS

The Motorweb Argos Link is a connection to the Motorweb website. The main benefit of this module is that the vehicle information is downloaded into the collateral dialog within the software meaning it is 100% accurate and saves data entry time. Essentially all vehicle information is imported and complete by the click of a button. There are 3 levels of reports available within Motorweb.

ARGOS VAULT

Sends report request

MotorWeb™

Autofill's Argos Vault with vehicle information and returns report

THE REPORTS

There are 3 levels of reports that can be requested. The information they return is as follows:
